To whom it may concern,

I am aware of how the voting occurred and how the results have turned out regarding the decision of Valley Asphalt moving their hot plant to Genola. I feel we have been misrepresented and disagree with the decision of the Mayor.

I have two very young children with asthma. It is also called Reactive Airway Disease. They react to certain things in the air. Pollution has been a big factor in the majority of their asthma attacks. We have learned how to help our boys and prevent them from having to go to the hospital for treatment and oxygen. I am afraid the excess exhaust, dust and other pollutants in the air may create a problem we won't be able to handle at home anymore. The attacks are very frightening, especially to a young child.

I am hoping that another vote will take place and be done honestly. I don't need another hospital bill or sick child.

Thank You,

Beverly Madsen
